At this company startup I was entrusted with working on a new product. In it I hold 3 types of web.

#### Responsibility

- Implementing various UI/UX designs from figma to code (using Next JS, TypeScript, Chakra UI/Tailwind)
- Integration with Rest API and using Redux Toolkit for state management
- Making the interface responsive and comfortable to use on tablets and mobile
- Familiar with work methods that use agile scrum
- Perform CI/CD deployment using the cherry pick method

### Frontend Developer

PT Padepokan Tujuh Sembilan

02/2021 - 02/2022

Bandung

Tujuh Sembilan is an IT consultant company which provides skillful talents as IT services for our clients

#### Responsibility

- As a front-end developer, I create views according to the requirements and mockup designs made by the UI/UX team. Next, I split it into several small components to make them global, reusable components. Lastly, integrate each existing data set using Axios and Postman as API management tools. All of this is done by implementing clean code and best practices React Js.
